

We invest in continuous improvement by introducing tools that improve the total quality of the company.

CPA Quality Services **was created in 2006** with the undertaking of **developing an in-house excellence-based management model**. For us, aspects such as **efficiency, teamwork, continuous improvement** or **respect for the environment** are vital parts of the production process.

Our aim is **to support the quality control process of the products produced internally**, in different areas such as the **automotive, industrial, transport, railways** or **aerospace sectors**. Thanks to **our specialist team**, we are able to integrate quality into all process and to control and monitor the variables of the production process and their impact on product quality.

CPA Quality Services is your ideal partner and a guarantee of success.

We have a flexible team to adapt to the specific needs of each client, providing solutions with a maximum of 24 / 72 hours

TOTAL QUALITY SERVICES (TQM)

CPA Quality Services offers support and quality solutions adapted to meet client requirements.

We guarantee part quality at the client's plants and in suppliers' and in-house facilities. We generate daily reports, indicating the service provided and the assurance of production in order to fully control the process.

We use **innovative tools** to become faster and more effective. We follow the standards of the new Industry 4.0.

- ▼ Optimisation of production processes
- ▼ Quality Walls
- ▼ Cause and effect analysis
- ▼ Mechanical / Electrical / Bodywork
- ▼ Full equipment
- ▼ Cost reduction
- ▼ Sampling, selection and recovery of non-compliant parts
- ▼ Orientation of the client's activity towards "zero defects"
- ▼ Lean manufacturing
- ▼ Metrology

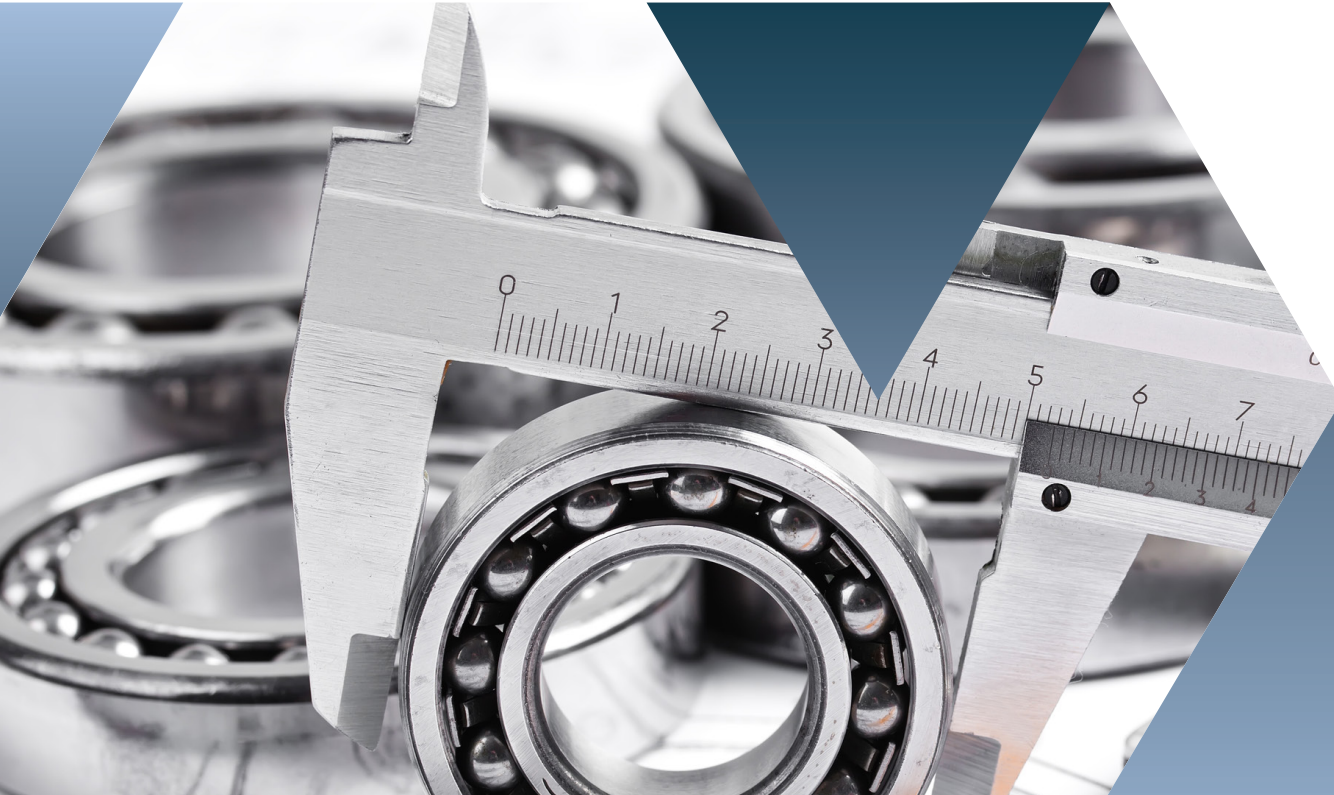

IN-PLANT PRE-ASSEMBLY AND LOGISTICS

All of our processes are certified under the ISO 9001 quality standard

We manage the **in-plant movement of components and sub-assembled products** from and to the storage points or assembly chains to turn them into end products.

We also offer our clients the possibility of making pre-assemblies, integrating this stage into the logistics process itself.

- ▼ Reception, control and storage
- ▼ Preparation of shipments
- ▼ Pre-assembly solutions to simplify production processes
- ▼ Real-time communication of all information
- ▼ Packaging guidelines

ENGINEERING

CPA Quality Services is an innovative company that offers multiple services for the development of projects of different types and scope.

We mostly work in the automotive and industrial sectors, providing custom solutions to ensure project success.

- ▼ Product engineering
- ▼ Quality engineering
- ▼ Process engineering
- ▼ Support and maintenance
- ▼ Audits
- ▼ Consulting
- ▼ Resident engineer
- ▼ Project management
